LED FLEXLINE

For Unlimited Design Possibilities

FLEXLINE

Light that takes shape

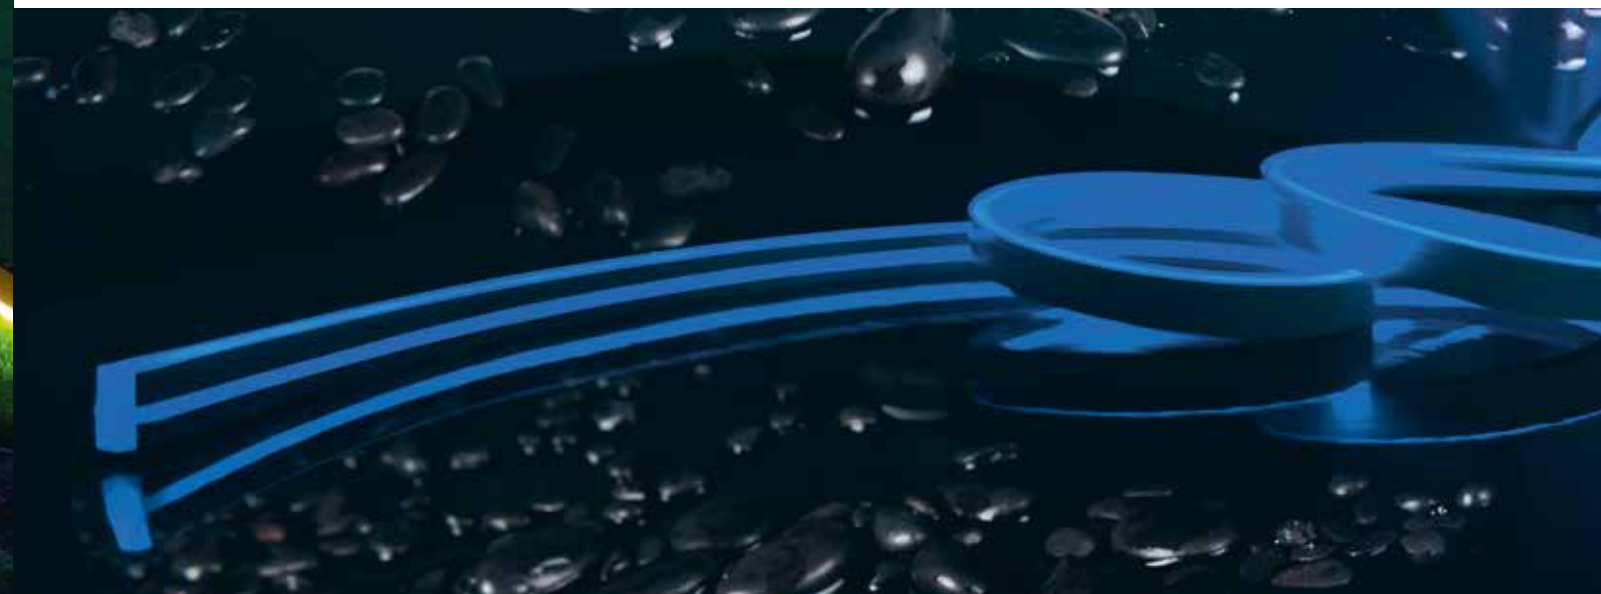

FLEXline – Flexible light lines for maximum design freedom

With FLEXLINE, you can create homogeneous light lines that adapt flexibly to any shape while meeting the highest standards in design and durability. This fully silicone-encapsulated LED system offers maximum freedom for creative applications – both indoors and outdoors.

Use FLEXLINE to create impressive, uniform light lines that effortlessly follow contours, lettering, or architectural shapes. The flexible silicone profiles are fully protected against moisture, dust, and contact, making them ideal for indoor and outdoor use.

The high-quality, UV-resistant silicone material ensures a consistently even light output without visible light points and reliably withstands weather influences. As a result, FLEXLINE remains dimensionally stable, flexible, and visually high-grade over the long term – even under direct sunlight.

Thanks to production in Germany, profiles, light colors, lengths, and brightness levels can be customized for each project – starting from batch size 1. FLEXLINE combines creative freedom with durable, professional LED technology.

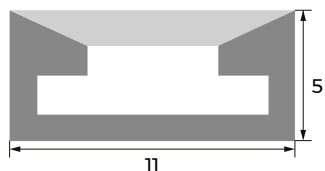

FLEXLINE TOP 0511

SPECIFICATIONS

- Article No.: 0835650001
- Outer Dimensions: 5 x 11 mm
- Inner Width: 8 mm
- Material: Silikon
- Surface: clear, white

TECHNICAL DRAWINGS

ACCESSORIES

- 0890650084
- 0890650085
- 0880650025

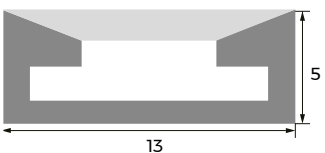

FLEXLINE TOP 0513

SPECIFICATIONS

- Article No.: 0835650002
- Outer Dimensions: 5 x 13 mm
- Inner Width: 10 mm
- Material: Silikon
- Surface: clear, white

PRODUCT ADVANTAGES

WEATHER-RESISTANT

The material used is UV-resistant and can be used outdoors without any issues. Additionally, the FLEXLINE profiles can be sealed against the ingress of dust and water.

HOMOGENEOUS LIGHT

The diffusion layer of the FLEXLINE profiles ensures uniform illumination without visible light points – ideal for mirrors or smooth surfaces.

VERSATILITY

There are countless configuration options available in terms of brightness, color temperature, and more.

FLEXIBILITY

FLEXLINE profiles can be used to evenly illuminate shapes and contours. Depending on the version, various mounting options are available.
