PISA LED FOR REFRIGERATION

Showcases every individual shelf to perfection

PISA LUMINAIRE

Precision lighting for optimal illumination of refrigerated displays

The PISA LED luminaire has been specially developed for use in refrigerated display cabinets – where every shelf counts and perfect illumination directly influences purchasing decisions. With five selectable beam angles, PISA provides targeted, uniform light distribution across all shelf levels – without stray light or shadow zones.

- **Five beam angles (adjustable by clipping)**
for targeted shelf illumination
- **Uniform light distribution**
without shadows or glare
- **Efficient LED technology**
with low heat generation
- **IP54 protection**
for damp environments and refrigerated displays
- **Easy integration**
into new and existing refrigerated displays
- **Slim aluminium profile**
robust, space-saving and easy to install

Thanks to high-quality lens technology, the light falls **like a curtain from top to bottom**, illuminating every shelf evenly. A choice of light colours presents fresh products such as dairy products, beverages or convenience food to brilliant effect. The slim, robust housing made of anodised aluminium is IP54-rated, making it ideal for damp, cool environments requiring frequent cleaning.

980 mm	24	2000	2650	4000K	90	20	PI09804101
1220 mm	18	1550	2000	4000K	90	20	PI12204100
1220 mm	30	2450	3200	4000K	90	20	PI12204101
1460 mm	21.6	1900	2400	4000K	90	20	PI14604100
1460 mm	36	2950	3850	4000K	90	20	PI14604101

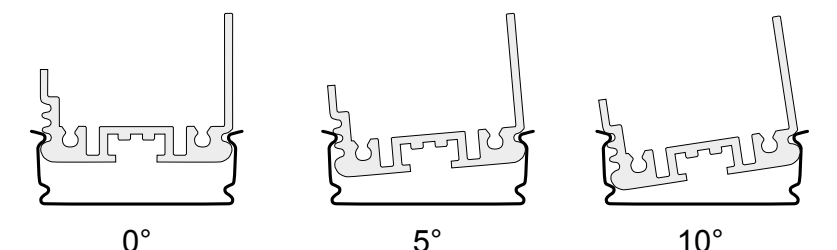

FIVE ADJUSTABLE BEAM ANGLES

Optimised for refrigerated display cabinets: with five precisely coordinated beam angles, PISA provides uniform, glare-free illumination across all shelves – presenting chilled and frozen products in the best possible light at every level.

MOUNTING CLIPS

The different angles can be adjusted by changing the position of the clips.
